As an additional bonus, he was able to correct misalignments which had bothered a few of his clients for several years. Richard discovered that he could teach anybody this particular method which combines subtle energy along with quantum physics, focused intent, and active imagination.

The physical body is a resonating matrix of information within the biological field. According to Matrix energetics philosophy, the patterns in the resonating matrix could become transformed from emotional or physical injury. These disturbances can result in embedded perceptions or habits which can block a person from achieving a state of prosperity, health, happiness and several positive circumstances. Matrix Energetics works to get rid of blockages, transfer these ingrained patterns and alter core beliefs in order to allow the client to attain their objectives so as create the type of life and quality of life desired.

Practitioners of Matrix Energetics believe that preconceived notions of restrictions are the source of an individual's issues and that these limitations could be eliminated at once through the healing system of Matrix Energetics. This healing system is thought to eliminate the sources of both chronic and temporary concerns such as muscle spasms, scoliosis, fibromyalgia, emotional trauma and headaches amongst others.

The Matrix Energetics system is intended to stand alone. A lot of practitioners utilize it so as to enhance other healing techniques though it does not have to be at all combined along with whichever other practice. One session with a Matrix Energetics practitioner can change the belief system of the customer and could transform her or his beliefs regarding the nature of disease, the healing process and the structure of reality. Normally, recipients may feel a wave pass through their bodies for the reason that their previous view of reality is transformed and this is where the Matrix Energetics system enters into the realm of quantum physics.

Time and space are not a part of actuality at the quantum level. An individual's consciousness could affect how subatomic particles behave, according to the quantum theory. Since the universe is interconnected with quanta, or tiny wave particles of information, that could be transferred at a rate faster than the speed of light, these quanta could appear everywhere concurrently and even move forward and backward in time. An individual's consciousness can affect these quanta to transform physical matters and emotions. These views and this particular information have been incorporated into the Matrix Energetics treatments and are accountable for the changes which happen on the cellular level within the patient.
